

MiniMag combined with Sputnik-excellent for people on the move

MiniMag magnet mount antenna combined with the portable *ground plane Sputnik*, is an excellent solution for people on the move, for rental cars, taxis etc. Very small and light, takes minimum space in your briefcase or pocket. For frequencies up to 2500 MHz. Improves the signal to ensure the best possible coverage for the phone.

Extremely easy to mount: just place it on the car roof. Stays on safely at speeds over 200 km/h (125MPH), or place it on the *Sputnik ground plane* with its suction cup that allows mount on any clean and vertical surface.

MiniMag has an attractive and discreet design and is available in complete sets, to facilitate your choice and ordering process.
